VITAPECT- 2®

Vitamin-enriched dry apple food additive

One tea spoon (5 g) of powder contains:

Apple pectin 4353 mg

Vitamins:

B2	0.2 mg
B6	0.7 mg
B12	0.0006 mg
C	20 mg
E	3 mg
Beta carotene	1 mg
Folic acid	0.04 mg

Mineral substances:

K	125 mg
Zn	3 mg
Se	0.015 mg

Taste additives:

Citric acid	200 mg
Lactose	150 mg
Saccharine	20 mg

"VITAPECT-2" effectively binds and removes radionuclides and ions of heavy metals from the organism.

"VITAPECT-2" consist of natural product, enriched by vitamins and mineral substances.

Properties and operation: the natural apple components which are included into the structure of "VITAPECT-2", promote operation of all known mechanisms of binding and abjection with pectin of ions of heavy metals, radionuclides:

- There is binding or complex formation of ions of heavy metals and radionuclides;

- The viscosity of intestine contents increased;

- The re-sorption of bound ions of heavy metals and radionuclides decreases;

- There are optimal conditions for breeding of intestine microflora;

- Normalizes the level of cholesterol in a blood;

- Increases the parameter of lipoproteins of low and high density (LLD and LHD), that reduces hazard of myocardial infarction.

"VITAPECT-2" apply:

- In districts with unsatisfactory environmental conditions and in territories, contaminated after accident on Chernobyl NPP, in regions of NPP operation, production and processing of uranic ores;

- For preventive maintenance of professional diseases and intoxications at the enterprises with the hazardous production conditions;

- For maintenance of normal operation of alimentary system, at coli-

tis, colenteritis, coprostasia, dysbacteriosis of intestine;

- For preventive maintenance of atherosclerosis and sugar Diabetum;

- At chronic intoxications;

- For stimulation of metabolism.

As a result of application "VITAPECT-2" in Chernobyl districts of Belarus, the contents of radionuclides in organism of children reduced on 40-90% within 24-30 days.

Method of application: before the use dissolve in 100-150 ml of water 1 tea spoon (5 g) of powder.

"VITAPECT-2" is recommended to apply for adults - on 1 tea spoon of powder 3 times per day, for children - on 1 tea spoon of powder 2 times per day within 20-25 days.

The course of preventive maintenance is recommended to retry quarterly.

"VITAPECT-2" is produced in powder form of hazel color of mass from 150 g up to 500 g in suitable container, allowed by the Ministry of Public Health of the Republic of Belarus.

Contraindications: to children till three years.

The storage conditions: keep in the densely closed container in dry cool place.

Working life: 1 year.
